

Stakeholder submission for the 43rd session of the Universal Periodic Review

Report on Israel

The International Campaign to Abolish Nuclear Weapons (ICAN) is a campaign coalition of over 600 non-government organizations in over one hundred countries. Following the historic achievement of the adoption of a strong nuclear weapons ban treaty, ICAN now campaigns for all States to sign and ratify the Treaty as a matter of urgency, take measures towards the global elimination of all nuclear weapons, and provide an overdue response to the victims of the humanitarian and environmental impact of nuclear weapon tests in the Pacific and elsewhere.

ICAN was awarded the Nobel Peace Prize in 2017 for “its work to draw attention to the catastrophic humanitarian consequences of any use of nuclear weapons and for its groundbreaking efforts to achieve a treaty-based prohibition of such weapons.”

National Human Rights Framework

The Treaty on the Prohibition of Nuclear Weapons has clear references to and implications for human rights law and practice. Preambular paragraph 8 reaffirms “the need for all States at all times to comply with applicable international law, including international humanitarian law and international human rights law” The most relevant rights concern from a nuclear weapons attack is the right to life, other relevant rights concerns include the prohibition of inhuman and degrading treatment, the right to a home and to property, as well as rights violations resulting from nuclear weapons testing.

Nuclear weapon possessing State

Israel possesses approximately 90¹ nuclear weapons. As it neither confirms nor denies that it has such weapons, little is known about its arsenal, but it is believed to be able to launch nuclear weapons from missiles, submarines, and aircraft. In 2021, Israel spent an estimated \$1.2 billion² to build and maintain its nuclear forces.

ICAN urges Israel to sign and ratify the TPNW, and work towards the complete elimination of all nuclear weapons, as a matter of international urgency.
